

Mod 09 PowerShell Flow Control Homework

SCRIPTING ESSENTIALS

DR. BURKMAN

Mod 09 Homework

Name your script `Mod09Homework.ps1` and leave your script on the desktop.

You are making a script to purchase a soda. Your user can enter 5 for a nickel, 10 for a dime, and 25 for a quarter (Explain these choices to them). Ensure that they can only enter these amounts.

The base price of a soda is \$1.00, but we'll set a random price prior to each soda purchase. We will vary the price by 0, 5, 10 or 15 cents in either direction from \$1.00.

Put your name and Mod 05 Homework at the top of your script.

See the video for sample output. Your output must match mine in looks and behavior.
