

HW3 - Tableau Assignment

Due Mar 9 by 11:59pm **Points** 100 **Submitting** a file upload **File Types** pdf
Available Feb 23 at 5pm - Mar 9 at 11:59pm 14 days

This assignment was locked Mar 9 at 11:59pm.

This assignment illustrates some of many Tableau features using an airplane bird strikes data set.

Here are the specifics:

1. Download, install and license your copy of Tableau. The instructions are in the Software section of this class website.
2. Attached are the description file and the data file (in Excel format). Download and save them in a folder.
3. Perform the assignment as per the assignment description. That is, replicate everything exactly as shown in the assignment document. **Additionally, I want you to come up with at least three questions/hypotheses of your own and analyze them using Tableau visuals (i.e., charts and graphs).**
4. Prepare and submit a professionally formatted PDF document here by the due date/time. Make sure to include a cover page, your data analyses with Tableau including your figures (screen captures) and textual descriptions.

Good luck!
